

3 years of pay at half the rate of inflation?

Sign our petition and support the campaign for a fair pay award for NHS staff.

We the undersigned believe NHS staff deserve a fair pay award. The three-year pay deal imposed by the Government is a real pay cut for staff, awarding annual increases that amount to barely half of a rapidly growing rate of inflation. This is unfair - 7.99% over 3 years is poor reward for staff who deliver vital health care services to patients, service users and local communities. It will cause long-term damage to the morale of NHS staff.

At a time when people are experiencing significant rises in living costs they cannot avoid, the Government should urgently re-open pay negotiations with the trade unions.

We say 'Cut NHS Pay - No Way!'
